

SC.ORB

One Platform. One Truth. Contractor Compliance as a Systemic Outcome.

A unified, cloud-based platform that aligns contractor personnel (and internal personnel if the Operator chooses) with your specific policies, procedures, and requirements in real time — transforming compliance from fragmented overhead into a systemic outcome.

Why SC.ORB?

Operators bear 100% of liability for contractor actions — yet most compliance systems give them zero systemic control. This is the Variability Paradox. SC.ORB permanently fixes it.

The Problem Today	The SC.ORB Solution
Wrong OQ Task Lists: Contractors use someone else's covered tasks, not yours (~\$247K avg. penalty)	1:1 Mapping: Forces every qualification to map to your procedures and your task list
Unauthorized Evaluators: Lapsed evaluators invalidate qualifications (~\$298K penalty)	Evaluator Control: Only SC-authorized, audited, and tracked evaluators qualify personnel
Conflicting Safety Procedures: Contractors follow their own safety procedures on your site which many times are misaligned (~\$189K avg.)	Standardized SWP: Contractors adopt your safety framework. One audit covers everyone's peaks without emergency hiring.
Expired Insurance Unnoticed: COI lapses lead to \$1M–\$15M litigation settlements	Real-Time COI Tracking: Auto-alerts at 60/30/7 days; approved status blocked until corrected
Procedure Changes Never Reach Contractors: Post-MOC requalification gaps (~\$200K+)	MOC Module: Instantly flags affected tasks/people and triggers requalification where appropriate
No Real-Time Visibility: "E-Mail me the PDF" culture (wastes valuable time for the Operator)	Live Operator Portal: Every record instantly visible — no searching, no delays

Platform Architecture

SC.ORB is not another questionnaire portal. It is the industry's first true management-system platform — connecting operators and contractors into one living, change-aware ecosystem.

- **Organizational Requirements Baseline (ORB):** Your single, version-controlled source for all procedures, covered tasks, KSAs, safe work practices, and any other requirements the Operator deems important.
- **Management of Change (MOC) Module:** Automatically evaluates changes to organizational requirements → identifies affected tasks/people → automatic notification sent → triggers precise requalification where required.
- **Phase 1 Coverage:** Operator Qualification (OQ), Safe Work Practices (SWP), Drug & Alcohol Testing, COI Verification.
- **Expandable Framework:** Add Incident Investigation, Emergency Response, and other PSMS elements — without new onboarding.

PSMS / API RP 1173 Alignment

PSMS Element	Today's Problem	How SC.ORB Enforces Alignment
Management of Change	No unified process across sites	Automated change detection → system-wide management
Competence & Training	Multiple OQ platforms with conflicting criteria	Single ORB maps every task to your procedures
Operational Controls	Contractors bring their own procedures	Contractors conform to the Operator's own procedures and other requirements
Risk Management	Risk registers in spreadsheets; contractors never see them	Operator-specific risk mitigation priorities drive requirements in the ORB automatically

SC.ORB (cont.)

Operator Pricing - Annual Platform Fee

Simple, transparent pricing based on the number of active contractors you manage. No hidden fees, no per-transaction costs. Includes: SC.ORB platform license, unlimited users, full ORB build & maintenance, data migration from legacy platforms, and dedicated onboarding specialist.

Additional Operator Services

Service	Description
Contractor Auditing	Each approved contractor audited at least once annually
SME Consultant	Subject matter expert consulting support
Administrative Support	Administrative and clerical consulting support

Contractor Pricing

Service	Description
Initial Account Setup	One-time onboarding fee
Individual Subscription Fee*	NO COST
Annual Audit	OQ, D&A, COI, safety and records verification. Audit itself is no cost - fees apply only if corrective action is required following a failed audit.
Evaluator Certification	One-time application fee
Initial Evaluator Training	Instructor-led certification training
Annual Evaluator Refresher Training	Web-based annual refresher

**Unlike legacy platforms, SC.ORB does not charge subscription fees to your contractors.*

The Cost of Inaction

Risk Area	Avg. Cost Per Incident	SC.ORB Prevention
OQ Violation (wrong task list)	\$247,000	1:1 procedure mapping eliminates misalignment
Evaluator Lapse	\$298,000	Centralized evaluator authorization & tracking
SWP Violation	\$189,000	Standardized safety framework across all contractors
Post-MOC Requalification Gap	\$200,000+	Automated change detection & requalification triggers
COI Lapse → Litigation	\$1M–\$15M	Real-time tracking with auto-block
